

## Fuel Injection Lines For Dodge/Ram 6.7L Engines

The fuel injection lines for Dodge and Ram 6.7L engines are now available from DTech. In addition to the fuel lines running from the high-pressure rail to the injectors, DTech has added the fuel line going from the high-pressure fuel pump to the rail. We focus attention on the integrity of the fuel lines going from the rail to the injector and forget the feed line from the high-pressure pump to the rail is subject to the same wear and contamination factors. These fuel lines can be used in model years 2007 through 2018. Below are the part numbers and cylinder applications:

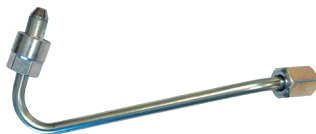

<b>DTech Part</b>	<b>Cylinder Application</b>	<b>Dodge/Ram Part Numbers</b>
DT670010	Pump To Rail Feed Line	68005436AA
DT670011	Cylinder 1	68005437AA
DT670012	Cylinders 2 + 4	68005438AA
DT670013	Cylinders 3 + 5	68005336AA
DT670014	Cylinder 6	68005435AA

Each part number is shown below.

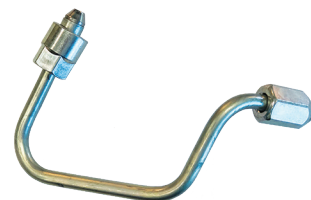

DT670010

DT670011

DT670012

DT670013

DT670014
